

**Astral™ series**  
Life support ventilators

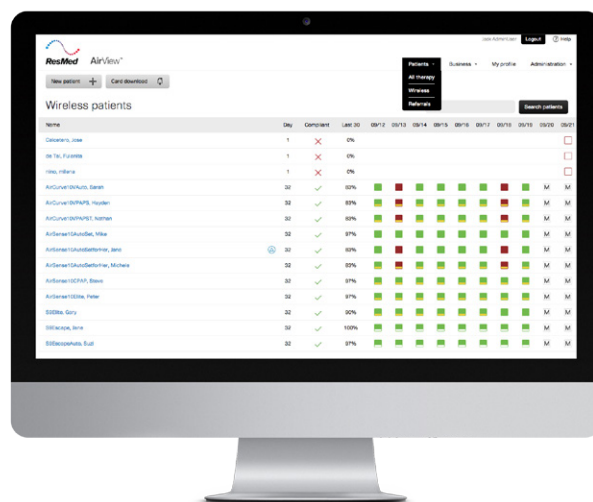

Supporting your patients' every breath

# Stay informed of patient changes throughout the therapy journey

Improve patient care through connectivity.

Astral's connectivity to AirView™ gives physicians and home medical equipment providers (HMEs) access to key patient data in the cloud, enabling efficient and collaborated patient care:

- Stay regularly informed on patient progress and provide more timely intervention before a potential problem or hospitalization occurs.<sup>†</sup>
- Daily access to key ventilation parameters such as usage, Apnea Hypopnea Index (AHI),<sup>††</sup> tidal volume, minute ventilation and respiratory rate.
- Manage sleep and ventilation patients in one system that is easy to use.

**AirView™**

Monitoring options with at-a-glance visuals

**ResScan™:** ResMed's patient data management software provides clinicians with a great way to view statistical, summary, detailed and alarm data.

**FiO<sub>2</sub> and oximetry:** Integrated FiO<sub>2</sub> and optional SpO<sub>2</sub> monitoring are available.

**Real-time waveforms:** Pressure and flow waveforms are quickly accessible on Astral's large color touch-screen, while offering continuous patient trending.

## Added safety features provide peace of mind when caring for dependent patients

**Alarms:** Astral is equipped with a set of fixed and adjustable alarms, categorized by priority.

**Disconnection Alarm:** The dedicated disconnection alarm allows for patient customization and gives caregivers peace of mind.

**Big button:** Included for quick access to start or stop ventilation, as well as to mute alarms, this feature is particularly useful for those with impaired dexterity or eyesight.

Big button for greater accessibility

<sup>†</sup> Data not available in real time.  
<sup>††</sup> AHI not available in all modes.

# Astral with iVAPS™

## A smarter solution for portable ventilation

Astral's latest set of clinical enhancements, which includes iVAPS (intelligent Volume-Assured Pressure Support), make it the industry's smartest life support ventilator. As each patient's condition changes, so may their therapy needs. That's why Astral, already renowned for its portability and intuitive color touch-screen, now features a suite of intelligent technologies that deliver adaptive ventilation to suit each patient's individual needs.

iVAPS

**intelligent Volume-Assured Pressure Support (iVAPS):** Targets and intelligently maintains each patient's alveolar ventilation.

iBR

**intelligent Backup Rate (iBR):** Provides backup breaths only when needed to give patients a chance to spontaneously trigger the ventilator.

## Personalized for patient comfort

With nine different therapy modes, including the newly added iVAPS, Astral offers the ultimate in personalized comfort. With offerings of single leak, single valve and double limb circuits, you can cater to a wide range of patient types – from adults to pediatric patients weighing as little as 5kgs (iVAPS therapy mode is indicated for patients weighing 30 kg and above). And for patients requiring oxygen therapy, Astral accommodates flow rates of 30 L/min, with integrated FiO<sub>2</sub> monitoring in Astral 150 for fine-tuning of oxygen therapy.

Astral also features the following technologies that can be fine-tuned to allow you to tailor therapy on a patient-to-patient basis, for individualized comfort and synchrony.

Vsync

Vsync for automated leak management

TiControl

TiControl™ for customized minimum and maximum inspiratory thresholds

NIV+

NIV+ technology for greater sensitivity in trigger detection

## Greater freedom

Astral ventilators strike the perfect balance of battery run-time with weight and portability to give patients the

**Battery options:** With an internal battery lasting up to 8 hours, and the capacity to add two external batteries, Astral's battery life can be extended up to 24 hours.

**Mobility bags:** When patients are ready for mobility, they have the choice of two custom-built, protective mobility bags that allow for uninterrupted ventilation on the go.

## Designed with efficiency in mind

Astral's award-winning design, easy setup and simple servicing make ventilation support straightforward and efficient.

**Quick and easy setup:** Astral's intuitive navigation and menus streamline staff training and enable consistent and accurate patient setup. And with QuickConnect™, you can easily incorporate two pressure lines into one.

Award-winning designs: Astral's craftsmanship was recognized in 2014 with an International Red Dot Award for product design, as well as Australia's Good Design Award.

e freedom to get out and enjoy day-to-day activities.

**Remote alarm II:** Patients on life support require close attention and care, but they can recuperate with an appropriate amount of independence by staying connected to remote or hospital alarm systems.

**Circuit Support Arm:** With its modern, flexible design and easily adjustable clamp, ResMed's mouthpiece ventilation circuit support arm not only conforms to therapy delivery requirements, it adapts to the lifestyle of your patients.
