

AirView™
Cloud-based patient management system

AirView advanced clinical reporting

Introducing ResMed AirView™ for Respiratory, a completely reimagined platform that will transform respiratory patient management. Featuring a new, intuitive interface, AirView for Respiratory now offers enhanced reporting features designed to improve efficiency and increase collaboration with referring physicians.

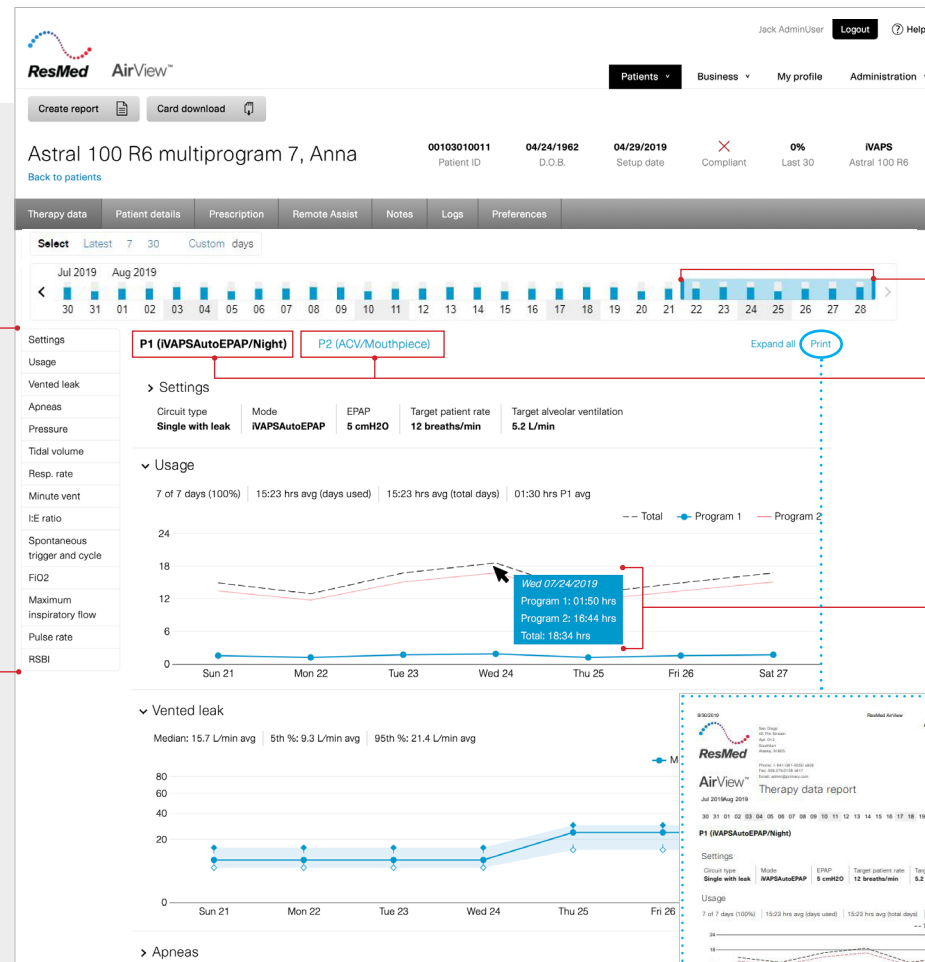

Patient identity and corresponding data used are fictional

Interactive reporting

Interactive reporting tools allow you to quickly analyze therapy trends across all programs and settings directly on screen.

Rapid navigation panel lets you quickly find the information you need

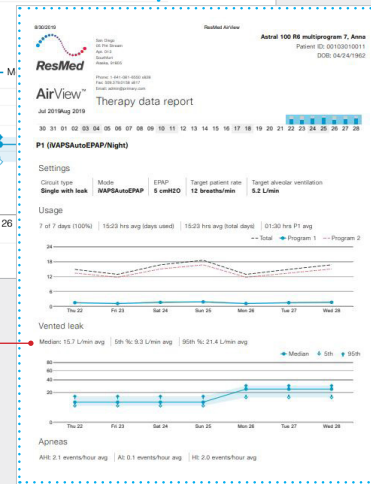

Drag or move sliders to the desired time frame and watch graphs update automatically

Easily switch between programs for more detailed clinical analysis

Hover over data points to see exact data values on screen

Print patient therapy data exactly as it appears on screen

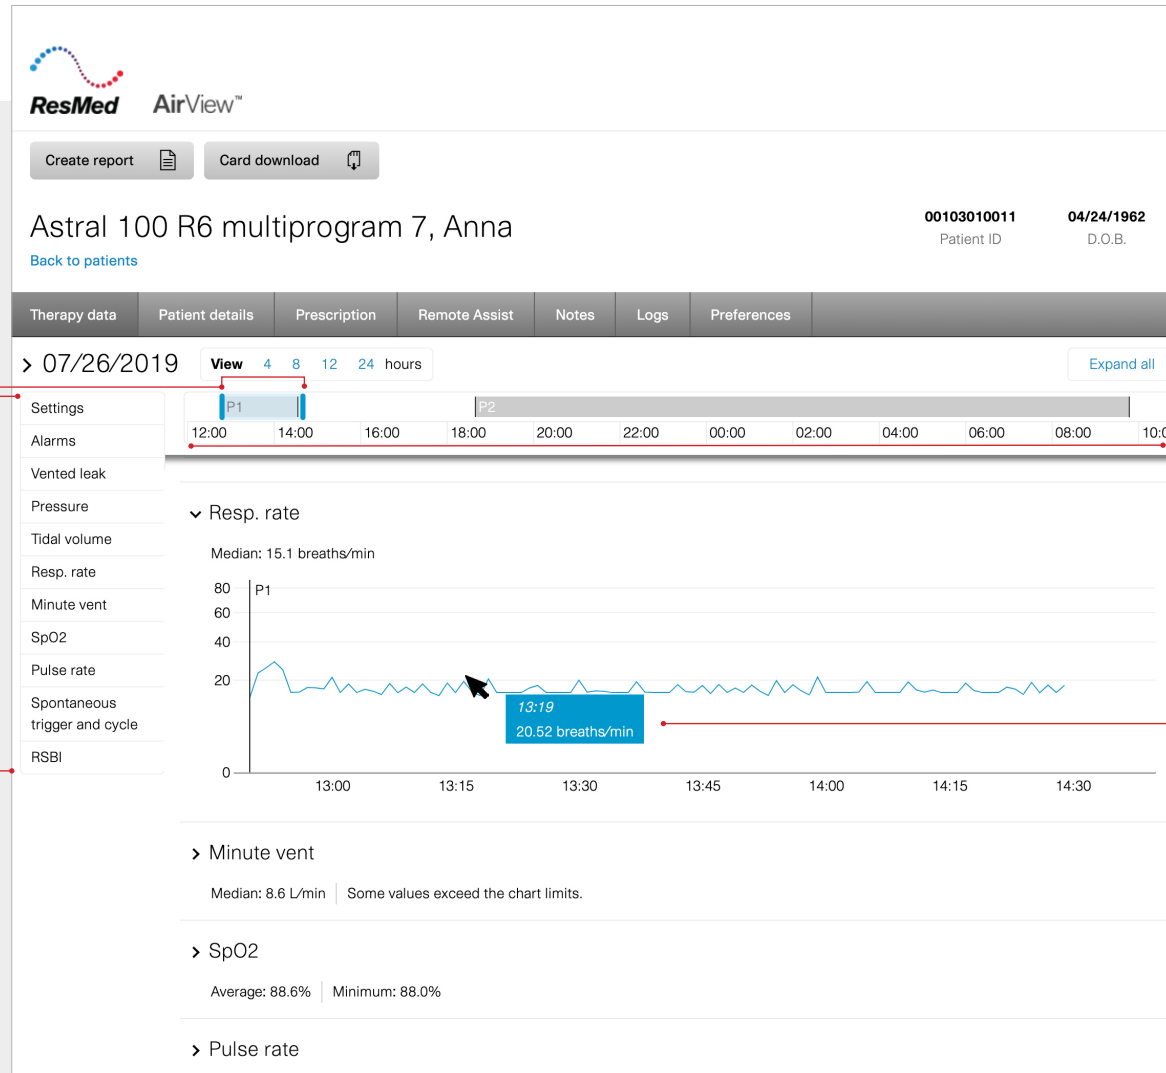

Detailed clinical analysis

Visualize variations in therapy trends with new levels of clinical detail and precision.

Zoom in and out to view data at the desired level of detail and time

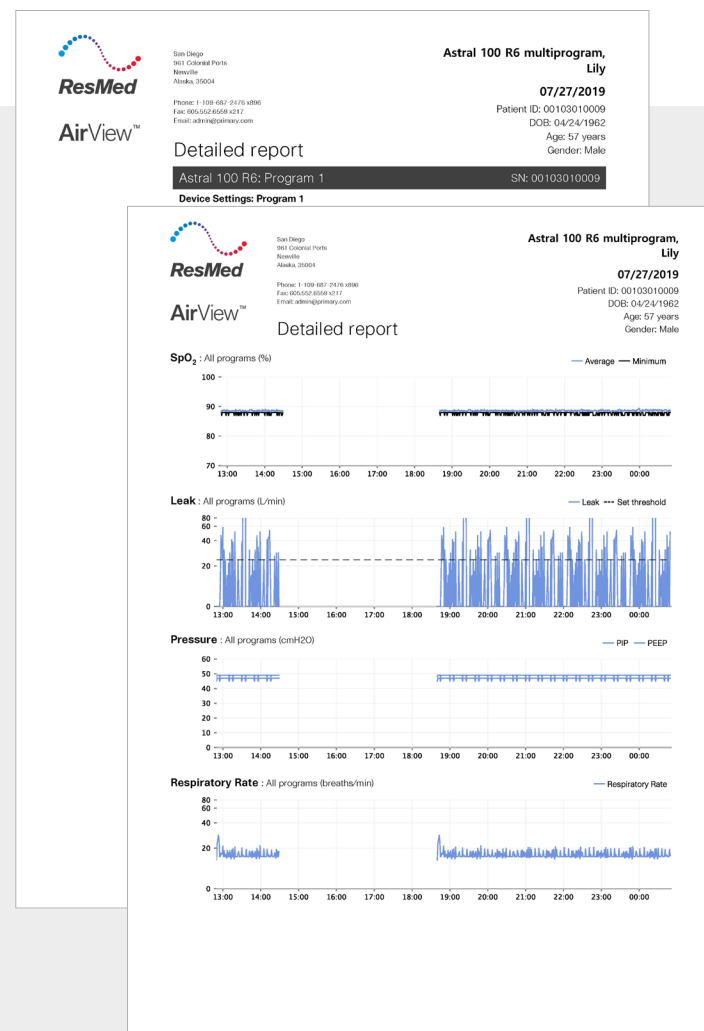

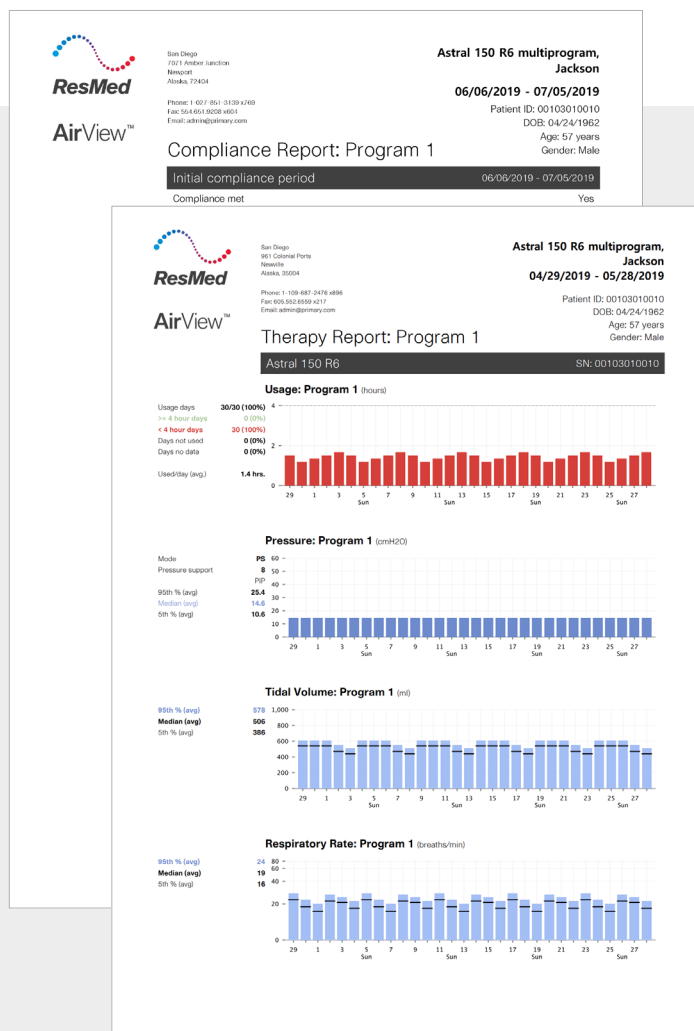

Rapid navigation panel allows you to quickly find data

AirView PDF report templates

The existing AirView report templates are still available for download.

Note: Report templates for ResMed Astral™ devices are limited to Program 1.

Patient identity and corresponding data used are fictional

When Astral is paired with the ResMed Connectivity Module (RCM), wireless connectivity is enabled, allowing key patient therapy data to be transmitted directly from Astral to the ResMed secure, cloud-based management system, AirView. Distributed by ResMed Corp, 9001 Spectrum Center Boulevard, San Diego, CA 92123 USA. (858) 836-5000 or (800) 424-0737 (toll free). See ResMed.com for other ResMed locations worldwide.
