

Deleting a Patient

Quick Reference Guide

Why?

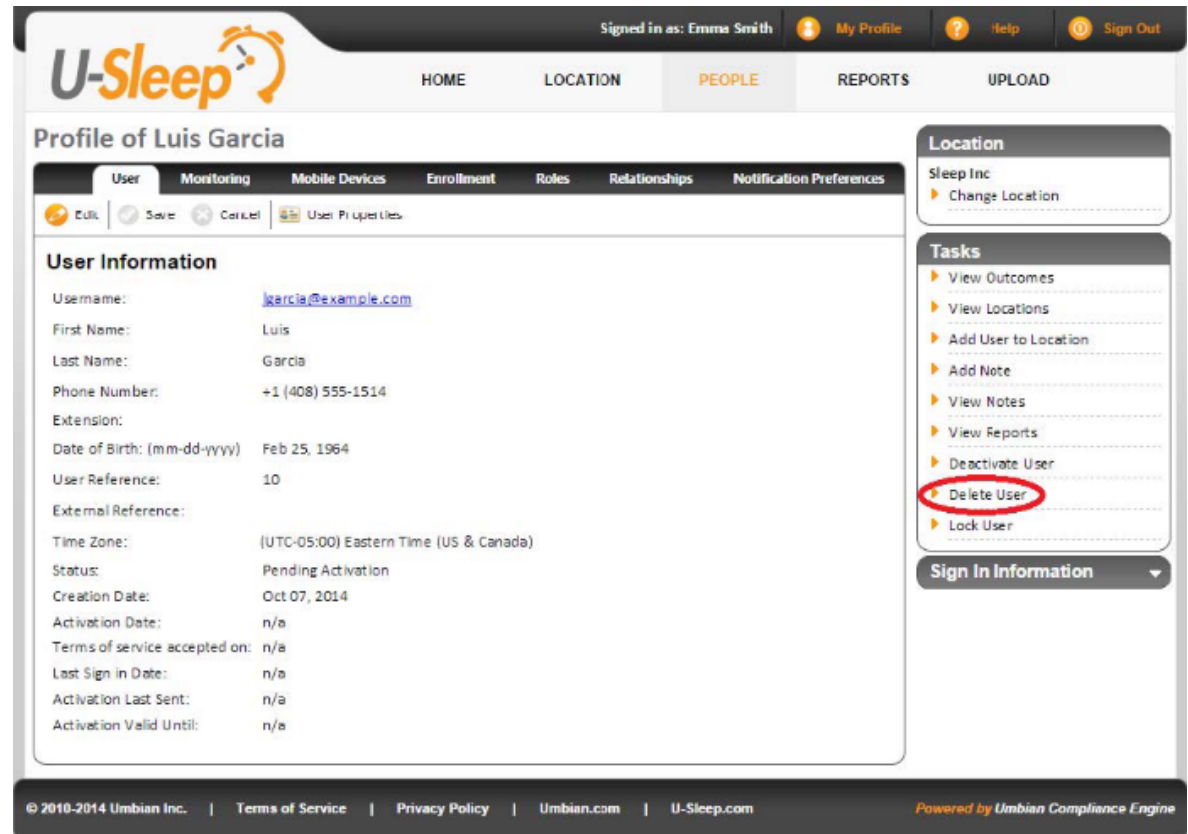

Perform this procedure if you want to delete a patient in U-Sleep™.

Note:

This procedure removes the patient's access to their account and *permanently* removes all their data and profile. You cannot undo this change.

How?

- 1 Sign in to U-Sleep.
- 2 Click the **People** tab.
- 3 Search for the patient that you want to delete.
- 4 Click **Delete User**.
- 5 Click **Yes**.

The screenshot displays the U-Sleep web application interface. At the top, the user is signed in as Emma Smith. The navigation menu includes HOME, LOCATION, PEOPLE, REPORTS, and UPLOAD. The main content area shows the 'Profile of Luis Garcia' with tabs for User, Monitoring, Mobile Devices, Enrollment, Roles, Relationships, and Notification Preferences. The 'User Information' section lists details such as Username (lgarcia@example.com), First Name (Luis), Last Name (Garcia), Phone Number (+1 (408) 555-1514), Date of Birth (Feb 25, 1964), and Status (Pending Activation). On the right sidebar, the 'Tasks' section contains several options, with 'Delete User' circled in red. Other tasks include View Outcomes, View Locations, Add User to Location, Add Note, View Notes, View Reports, Deactivate User, and Lock User. The footer includes copyright information for Umbian Inc. and the text 'Powered by Umbian Compliance Engine'.

* Patient identity and data are fictional.
