## Link a Physician for Interpretation

### **Description:**

*If your login allows you to access Interpreting physicians from the Administration menu, you can link an external physician to share and interpret patient data. To do so, you will also need to associate the linked physician with the patient.*

### **To link an interpreting physician:**

1. From the **Administration** menu, select **Interpreting physicians**.
2. To add a new physician, click **Link physician**.
3. Enter the physician's name, organization or provider number then click **Search**.
4. Select the required physician.
5. Click **Link** to complete.

**Note:** *You can associate the linked interpreting physician with the patient in the Clinical details on the New patient screen, or Basic details in the Patient details tab on the Diagnostic patients screen.*
